EDUCATION

Harvard University

Cambridge, MA

Bachelor of Arts in Applied Math, GPA: 3.97/4.0

Sep. 2021 – May 2025

- Relevant Coursework: Data Structures and Algorithms, Artificial Intelligence, Applied Linear Algebra and Big Data, Probability, Statistical Inference, Data Science
- Harvard Detur Book Prize winner (academic performance in top 10% of class)
- 2x John Harvard Scholar winner (academic performance in top 5% of class)

Hopkins School

New Haven, CT

High School Diploma, ACT: 36, SAT: 1560

Sep. 2015 – May 2020

- National Merit Scholarship winner

EXPERIENCE

Teaching Assistant

June 2024 – Aug. 2024

Jane Street

New York, NY

- (Python) Taught top-level data structures / algorithms class, designing coding assignments and giving feedback
- Analyzed optimal strategies for quantitative trading simulations
- Led discussions on data science and market making for 100 students

Software Engineer

June 2023 – Aug. 2023

Project Music

Stamford, CT

- (pandas, Scikit-Learn) Developed regression model from donation data to determine priorities for future outreach
- (HTML/CSS) Redesigned website; worked with clients and board members to determine essential features, including multilingual support, a more accessible donation page, and more streamlined data collection

Undergraduate Fellow

Sep. 2021 – May 2022

Harvard Bok Learning Lab

Cambridge, MA

- (HTML/CSS) Designed/developed interactive online tutorials and webpages for Harvard math/engineering classes

Programmer

June 2020 – Sep. 2020

Riskthinking.AI

Westport, CT

- (React.js) Engineered data visualization software for AI company predicting climate risk scenarios

PROJECTS

Financial Forecasting | *Matlab*

Apr. 2024 – May 2024

- Built feed-forward neural network from scratch and trained on several datasets using back-propagation
- Conducted time series analysis (MCA, multivariate PCA) on stock prices to forecast trends

10th place, Bloomberg BPuzzled 2024 Global Competition

Apr. 2024

- Placed 10th in global intercollegiate puzzle competition involving programming, mathematics, and creative problem-solving

Divide and Optimize / Fast Multiply Lab | *Python*

Apr. 2023 – May 2023

- Implemented and compared efficiency of several randomized heuristic search algorithms for solving the NP-complete Number Partition problem (Smallest Difference, Hill Climbing, and Simulated Annealing).
- Implemented Strassen's algorithm; experimentally verified optimal crossover point vs. conventional matrix multiplication. Both implemented in Python.

TECHNICAL SKILLS

Programming Languages: Python, R, MATLAB, SQL, HTML, CSS, Javascript

Libraries: pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Languages: Chinese (Fluent), Spanish (Intermediate)
